

contemporary garden rooms

Introducing a garden room to an outdoor area is a good way of extending living space and creating a focal point which can be utilised all year round. LifeSpace™ is a sleek, modern summerhouse which blends traditional warm timber with cool

aluminium and offers a contemporary solution for those seeking both function and style. It comes complete with half glazed or fully glazed doors which can be positioned to the left or right of the central upright. The modular design

of the building allows window panels to be positioned in a choice of locations. LifeSpace™ is of quality tongue and groove construction married with twin walled polycarbonate roof designed to diffuse sunlight.

lifespace™ standard

This building features a half glazed double door and a single opening window, both with secure locking systems. The floor is manufactured using a galvanised steel frame and covered internally with a 28mm deckboard floor.
